Searching ticket

```

1 import sqlite3
2 import pandas as pd
3
4 employee = input("Enter employee name: ")
5
6 conn = sqlite3.connect("helpdesk.db")
7
8 query = """
9 SELECT *
10 FROM tickets
11 WHERE employee_name LIKE ?
12 """

```

```

13
14 result = pd.read_sql_query(
15     query,
16     conn,
17     params=('%' + employee + '%',)
18 )
19
20 conn.close()
21
22 result

```

Enter employee name: Eric

	ticket_id	employee_name	department	issue_type	issue_description	priority	status	created_date
0	1	Eric Rathod	IT	Login Issue	Unable to login to Outlook account	High	Open	2026-06-04

Update Ticket Status

```

1 import sqlite3
2
3 ticket_id = int(input("Enter Ticket ID to update: "))
4 new_status = input("Enter new status (Open / In Progress / Closed): ")
5
6 conn = sqlite3.connect("helpdesk.db")
7 cursor = conn.cursor()
8
9 cursor.execute("""
10 UPDATE tickets
11 SET status = ?
12 WHERE ticket_id = ?
13 """, (new_status, ticket_id))
14
15 conn.commit()
16 conn.close()
17
18 print("Ticket Status Updated Successfully")

```

Enter Ticket ID to update: 1

Enter new status (Open / In Progress / Closed): closed
Ticket Status Updated Successfully

Delete Ticket

```

1 import sqlite3
2
3 ticket_id = int(input("Enter Ticket ID to delete: "))
4
5 conn = sqlite3.connect("helpdesk.db")
6 cursor = conn.cursor()
7
8 cursor.execute("""
9 DELETE FROM tickets
10 WHERE ticket_id = ?
11 """, (ticket_id,))
12
13 conn.commit()
14 conn.close()
15
16 print("Ticket Deleted Successfully")

```

Enter Ticket ID to delete: 5
Ticket Deleted Successfully

Ticket Status Report

```

1 import sqlite3
2 import pandas as pd
3
4 conn = sqlite3.connect("helpdesk.db")
5
6 query = """
